PROFILE

Software engineer with five years of development experience across React Native applications, React and Next.js web interfaces, and Node.js APIs. Interested in building practical AI-powered applications that help people work with complex information.

PROFESSIONAL EXPERIENCE

BETSoftware Current

Intermediate Software Developer

Work on React Native mobile applications with TypeScript and use Maestro for end-to-end testing.

Learning Sandbox Previous

Junior Software Developer

Contributed to learning management systems and interactive educational software using React, Node.js, AWS and Airtable.

SELECTED PROJECTS

Product Catalogue & Cart Mobile demo

React Native | Expo | TypeScript

Built a responsive shopping demo with a shared cart, item quantity updates, price totals and an order confirmation screen.

TaskChain Hackathon team

Next.js | TypeScript | GitHub API | Prisma

Worked on GitHub organisation tracking, repository selection and contribution sync in a team application.

Dino Park API Backend project

Node.js | Express | TypeScript | PostgreSQL | Knex

Implemented REST routes for park events, feeding schedules and zone maintenance with database migrations and queries.

TECHNICAL SKILLS

Mobile: React Native, Expo, Maestro | Web: React, Next.js, TypeScript, JavaScript

Backend: Node.js, Express, Python, REST APIs, PostgreSQL | Cloud and tooling: Azure, AWS, Docker, Git

EDUCATION

WeThinkCode - Higher National Diploma, Computer Software Engineering (2021-2022)

University of the Western Cape - BCom, Information Systems (2018-2020)
